

School Zones Variable Speed Sign

PROJECT DATA SHEET

COMPUTRONICS VARIABLE SPEED SIGN IMPROVES THE SAFETY OF SCHOOL ZONES.

This custom developed sign incorporates four highly visual elements.

1. Variable Message - The programmable message panel at the top provides an opportunity to communicate text messages.
2. Yellow Wig Wags - The flashing yellow clusters of LEDs demand the attention of motorists.
3. Variable Speed - The display has the ability to change the speed limit.
4. Illuminated Red Annulus - The annulus (the circle around the speed) is a familiar part of a static speed sign. Therefore, the illuminated annulus reinforces the display's function.

Other Key Features:

- ♦ Positioning over the roadway, in the line of sight of motorists.
- ♦ Easy to update calendaring system that can be unique for each school.
- ♦ Memory backup.
- ♦ Ability to report faults to a central control
- ♦ Event Log recordings for Law Enforcement purposes.
- ♦ Solar powered versions are available.
- ♦ IP65 Cabinets (Fully sealed.)
- ♦ Ability to attach to Streetscape poles.

Computronics specialises in custom solutions. These signs are the latest in technology and have the flexibility in design that allows for any future upgrades.
