

Wagerup Refinery Safety Board

Pinjarra Refinery Safety Board - Installed 2005

PROJECT DATA SHEET

ALCOA, THE WORLD LEADING PRODUCER OF PRIMARY ALUMINIUM, FABRICATED ALUMINIUM, AND ALUMINA, HAS RECENTLY INSTALLED A NEW SAFETY BOARD ON THE ENTRANCE ROAD TO THEIR WAGERUP REFINERY IN WESTERN AUSTRALIA.

August 2006

The new safety board is the second for Alcoa and the first of its kind to utilise blue LEDs. The Pinjarra Refinery safety board was installed in 2005 (bottom photo on left).

The new safety board was custom made to Alcoa's specific requirements.

Key features:

- ♦ 1 Line of 4 Characters (displaying production figures)
- ♦ 2 Lines of 16 Characters
- ♦ Character Height of 150mm
- ♦ UltraBright Blue LEDs
- ♦ Viewing Distance Approx. 80m
- ♦ Green LED Indicators for Injury Free Days and Production Targets
- ♦ White Cabinet Finish
- ♦ Photoelectric Night Dimming
- ♦ LAN Communication
- ♦ Custom Developed Software

Staff at Wagerup Refinery update the Safety Board daily with information on production, injury and safety messages.
