

Perth Airport Taxi Service LED Infoboard

PROJECT DATA SHEET

PERTH AIRPORT HAS JUST INSTALLED AN INNOVATIVE TAXI SYSTEM TO ASSIST VISITORS AND TRAVELLERS WHEN QUEUING FOR TAXIES.

August 2006

Computronics worked with Perth Airport to develop this unique electronic audio visual taxi system. The system uses a Computronics LED Infoboard to inform airport patrons that taxis have been called and will arrive shortly.

Key features:

- ♦ 4 Lines of 20 Characters per line
- ♦ Character Height 50mm
- ♦ UltraBright Red LEDs
- ♦ Viewing distance approx. 20m
- ♦ Communication to the display is via Serial Connection
- ♦ Key Switch Operated - ability to change preset messages instantly
- ♦ Custom Developed Audio Function - including a microphone connection for PA use
- ♦ Custom Developed Software

Staff at Perth Airport have programmed the display to show a default message, a taxi message with audio and an emergency message.
